SUMMARY

Front-End Engineer with 4 years of experience crafting scalable, high-performance web applications using React.js, Next.js, TypeScript, and Redux. Proficient in implementing tasks across the Software Development Lifecycle (SDLC) under structured guidance, while consistently delivering production-ready solutions with minimal oversight. Skilled in accessibility, SEO optimization, unit testing (80and modular UI development. Collaborates effectively in Agile teams, contributes to code reviews, and mentors junior developers. Passionate about building robust, responsive, and accessible digital experiences

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks/Libraries:	React.js, Next.js, Redux, Redux Toolkit, Material UI, Bootstrap
Backend:	Node.js (basics), REST APIs, GraphQL
Tools:	Git, Bitbucket, Azure DevOps, JIRA, Figma, Lighthouse
Testing:	Jest, React Testing Library, Mock APIs
Other:	Accessibility (WCAG), Performance Optimization, Agile/Scrum, AWS, Docker

EXPERIENCE

Solution Engineer — Gammastack Sept 2025 – Present

- Architected end-to-end authentication flows (Miracl) and integrated Cloudflare Turnstile (invisible CAPTCHA), reducing fraudulent submissions by 40% and strengthening security across 5+ user-facing forms.
- Integrated 10+ RESTful APIs, chat widget, and gaming platform features (tournaments, bonus systems, iframe games), enabling dynamic data rendering and a feature-rich user experience.
- Optimized application performance by resolving 15+ production bottlenecks, improving Core Web Vitals by 35% and maintaining 99%+ uptime through proactive bug fixes within sprint cycles.
- Leveraged AWS for deployment and CI/CD pipeline troubleshooting, resolved build failures, and implemented JavaScript obfuscation to protect proprietary client-side business logic.

Associate — Cognizant Technology Solution Feb 2022– Jun 2025

- Engineered scalable, WCAG-compliant web apps with React.js, Next.js (App Router), TypeScript, and Storybook; delivered pixel-perfect UIs in collaboration with design teams (Figma).
- Implemented SSR, GraphQL/REST API integrations, SEO optimization (Core Web Vitals) and CI/CD pipelines (GitHub Actions), improving deployment speed and search performance.
- Strengthened reliability with 80defects by 15

Projects at Cognizant:

Caterpi-CAT Digital – Rentals Apr 2024 – Jun 2025

- Developed search and shopping cart features using Next.js App Router and TypeScript.
- Collaborated with cross-functional teams (QA, designers, backend) to build robust systems aligned with business goals and technical standards.
- Designed scalable UI components with CSS Flexbox & media queries for responsive layouts.

- Conducted performance optimization & accessibility audits with Lighthouse to meet WCAG standards.
- Demoed features to stakeholders at sprint end and incorporated feedback to improve product quality.

Caterpi-CAT Digital – SOS 2.0

Aug 2023 – Mar 2024

- Built responsive UI components using React.js functional components with hooks and Storybook.
- Integrated React Hook Form for forms and connected APIs for dynamic data handling.
- Resolved accessibility & QA-reported issues while writing unit tests (Jest & RTL).

Lineage Logistics 1.x Implementation

Aug 2022 – Jul 2023

- Implemented i18next-based localization for dynamic label translations.
- Integrated API endpoints for workflows and data mapping.

EDUCATION

Bachelor of Enginnering(ECE) (CGPA: 8.4)

Vemana Institute of Technology, 2017- 2021
